

C Programming

Lab 3: if-else and switch-case

Lecturer: *Dr. Wan-Lei Zhao*
Spring Semester 2022

Outline

- 1 if-else
- 2 Embedded if-else
- 3 switch-case

if-else clause (1)

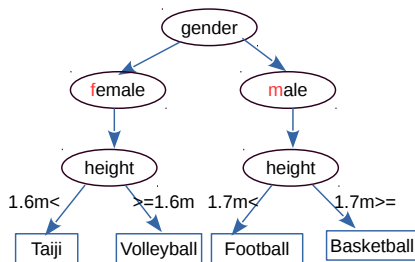

- Read a character from input
 - ① If it is in 0~9, print out "It is a digit"
 - ② If it is in 'a'~'z', convert it into upper case and print it out
 - ③ If it is in 'A'~'Z', print it out directly
 - ④ If it is blank, print "It is blank"
 - ⑤ Otherwise, print "It is not a visible character"

Outline

- 1 if-else
- 2 Embedded if-else
- 3 switch-case

Embedded if-else

- Given the height and gender of a student, recommend a sport for him/her

- For example, given male student with height 1.75m, it is recommended to play basketball
- The input is **m**/**f** for gender, and a positive float number for height
- The output is the recommended sports name

Outline

- 1 if-else
- 2 Embedded if-else
- 3 switch-case

switch clause

- Write C codes, which allows user to input number between 1 and 12 (the month)
 - Then your code tells the user to which season the input month belongs
- ① 2—4 : Spring
 - ② 5—7 : Summer
 - ③ 8—10 : Autumn
 - ④ 12—1 : Winter
